Full-stack developer and System Administrator with extensive experience in Coding, User Support, and End User Experience automation. Currently enthusiastically working on a certificate in full-stack development from UNC, with newly developed skills in HTML, CSS, JavaScript, JQuery, React js, and responsive web design. My fresh and innovative ideas and skills, along with total proficiency in all the major applications will enable me to contribute a better experience on the web.

TECHNICAL SKILLS

Frontend: HTML5, CSS, JQuery, Javascript, Bootstrap, AJAX, jQuery, React.js, API, JSON
Backend: Express, NodeJs, MySQL, MongoDB, MERN Stack,
Others: Heroku, GitHub, Data Structure, Unit Testing

PROJECTS

DefineHub | https://github.com/jordandub1/DefineHub | https://jordandub1.github.io/DefineHub/
Role: Backend Developer
- DefineHub is going to be a in-depth explanation of the word of your choosing.
- DefineHub uses WordAPI, YouTube API and Libre Translate API to display all information about said word. I have contributed in JavaScript and API Calls.
- Tools/Languages: JavaScript, HTML, CSS, Bootstrap, API (MapQuest, Libre translate, Open Weather)

Flipped Pages | https://github.com/nealsmithg/flipped_pages | https://obscure-beach-36412.herokuapp.com/
Role: Front End / Back End
- Flipped Pages is books library where user can visit the site and read, imagine, get recommendation on books which they might be interested in.
- Flipped pages uses Google Book API to fetch books and display their preview without leaving the site.
- Tools/Languages: - Javascript, HTML, CSS, Handlebars, Materialize, MySQL, Node.js, Express.js and Heroku
